Identifying the Student's Hidden Talent (AN UNIQUE PROGRAMME)

All the students are unique and they are talented in one way or other. We will have to find their hidden talent and invest in their improvement and growth. Students will be having their passion towards one field and market demand may be another. So we have to identify the talent of the student, their passion and the market need in general.

For example student will have talent in sports, but he/she may have interest towards music, but the market demand will be for another.

These three things need not be the same. Once these things are identified student can plan their future accordingly.

We have designed this unique programme to identify the strengths and abilities of a student that can go undetected in the formal educational environment. During this course we will cover wide range of activities such as learner styles and multiple intelligence, using modern technology to enliven lessons, motivate and encourage students to explore their talents that leads to their overall improvement.

Things won't be the same as it was earlier; we are entering into a new phase where the things change rapidly which we can't even imagine.

In this ever changing Scenario, Students have to constantly upgrade themselves to fit in the new era. All the previous theory, practice may not be applicable to the new generation in the modern technology advancement. Students wish to participate in **Identifying the Student Hidden Talent**.
